A flower can't live without the sun, nor can a marriage.

In all cultures there are customs and rituals which instill virtue and meaning to a couple's wedding ceremony and life together. These rituals are meant to inspire happiness, great mutual respect and everlasting love. These ceremonies will be individually created with each couple.

Together we will create a deeply unique memory for that special moment when you weave your lives together and say "I do". Give your partnership space and expression with the green treasures of Mother Nature. The plant's world gives you wonderful inspirations and energy, which you two will always be able to rely on.

Herbs and trees find their way to magical places in your heart.
